

SAFETY DATA SHEET

According to OSHA Hazard Communication Standard 29 CFR 1910.1200 (GHS)

Product name	Clearon EZ Bleach Disinfectant Tablets	
Product id	AS_9717BT_CLR	
Revision date	5/14/2020	Revision: 2

1. Identification of the substance & the company

Chemical name	Clearon Bleach Tablets
Synonym(s)	Effervescent NaDCC Tablets.
Type of product and use	Multi-purpose product including bleaching, cleaning, and deodorizing.
Supplier	Clearon Corp. 95 MacCorkle Ave. SW, South Charleston, WV 25303, USA Toll Free Number: 1-800-811-2327
Emergency Telephone	Medical: (800) 420-9236 Chemtrec: (800) 424-9300

2. Hazards identification

GHS classification	Eye Irrit. 2, H319 Causes serious eye irritation STOT SE 3, H335 May cause respiratory irritation Aquatic Acute 1, H400 - Very toxic to aquatic life Aquatic Chronic 1, H410 - Very toxic to aquatic life with long lasting effects
--------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Labels and other form of warning

Symbol(s)

Signal Word	WARNING
-------------	---------

Hazard statements	H319 - Causes serious eye irritation H335 - May cause respiratory irritation H410 - Very toxic to aquatic life with long lasting effects EUH031 - Contact with acids liberates toxic gas
-------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

SAFETY DATA SHEET

According to OSHA Hazard Communication Standard 29 CFR 1910.1200 (GHS)

Product name	Clearon EZ Bleach Disinfectant Tablets	
Product id	AS_9717BT_CLR	
Revision date	5/14/2020	Revision: 2

Ingestion	Call poison control center, or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
Most important symptoms and effects, acute or delayed	
- Eye Contact	This material is corrosive to the eye. Direct contact may cause severe irritation, pain and burns, possibly severe, and permanent damage including blindness. The degree of injury depends on the concentration and duration of contact.
- Skin contact	Direct contact with wet material or moist skin may cause severe irritation, pain, and possibly burns. Dry material is less irritating than wet material. This material is not a skin sensitizer based on studies with guinea pigs.
- Inhalation	This material contained in this tablet in solid form is not expected to produce respiratory effects. Particles of respirable size are generally not encountered. The respirable fraction for the tablet active ingredient is typically less than 0.1% by weight for the granular and extra granular grades. If it is ground or otherwise in a powdered form, effects similar to a corrosive substance may occur. May cause severe irritation of the respiratory tract with coughing, choking, pain and possibly burns of the mucous membranes. If significant or prolonged exposure occurs, pulmonary oedema may develop, either immediately or more often within a period of 5-72 hours. The symptoms may include tightness in the chest, dyspnea, frothy sputum, cyanosis, and dizziness. Physical findings may include moist rales, low blood pressure and high pulse pressure. Severe cases may be fatal.
- Ingestion	Not a likely route of exposure. Harmful if swallowed. Ingestion may cause immediate pain and severe burns of the mucous membranes. There may be discoloration of the tissues. Swallowing and speech may be difficult at first and then almost impossible. The effects on the oesophagus and gastrointestinal tract may range from irritation to severe corrosion. Oedema of the epiglottis and shock may occur
Note to physician	No specific antidote. Treat symptomatically and supportively. Probable mucosal damage may contraindicate the use of gastric lavage.
Medical conditions aggravated by exposure	Eye disorders, respiratory disorders, skin disorders and allergies

SAFETY DATA SHEET

According to OSHA Hazard Communication Standard 29 CFR 1910.1200 (GHS)

Product name **Clearon EZ Bleach Disinfectant Tablets**
Product id AS_9717BT_CLR
Revision date 5/14/2020

Revision: 2

5. Fire - fighting measures

Suitable extinguishing media Large amounts of water may be needed and the flow of water should not be stopped until the fire/reaction has stopped.

Extinguishing media not to be used Avoid using dry chemicals, carbon dioxide or halogenated extinguishing agents.

Unusual fire and explosion hazards When heated to decomposition, may release poisonous and corrosive fumes of nitrogen trichloride, nitrogen, cyanogen chloride, phosgene, chlorine and CO.

Fire fighting procedure Cool containers with water spray. Fire fighters should wear full protective clothing and self-contained breathing apparatus (SCBA) in positive pressure mode. On small fires, use water spray or fog. On large fires, use heavy deluge or fog streams. Flooding amounts of water may be required before extinguishment can be accomplished.

6. Accidental release measures

Personal precautions Avoid contact with skin, eyes and clothing. Chemical safety goggles Chemical resistant gloves

Methods for cleaning up Hazardous concentrations in air may be found in local spill area and immediately downwind. If spill material is still dry, do not put water directly on this product as a gas evolution may occur. Do not close containers containing wet or damp material. Do not transport damp or wet material.

Environmental precautions Prevent flow of material into water source and begin monitoring available chlorine and pH immediately.

- **Soil** Do not contaminate spill material with any organic materials, ammonia, ammonium salts or urea. Clean up all spill material with clean, dry dedicated equipment and place in a clean dry container.
- **Water** This material is heavier than and soluble in water. Stop flow of material into water as soon as possible. Begin monitoring for available chlorine and pH immediately.
- **Air** Vapors may be suppressed by the use of water fog.

SAFETY DATA SHEET

According to OSHA Hazard Communication Standard 29 CFR 1910.1200 (GHS)

Product name **Clearon EZ Bleach Disinfectant Tablets**
Product id AS_9717BT_CLR
Revision date 5/14/2020

Revision: 2

Boiling point/range	Not applicable
Flash point	Not applicable
Evaporation rate (ether=1)	Not applicable under standard conditions
Flammability (solid, gas)	Not flammable
Vapor pressure	Not applicable under standard conditions
Vapor density	Not applicable under standard conditions
Solubility:	
- Solubility in water	Completely miscible
Partition coefficient (n-octanol/water)	Log Kow - 0
Auto-ignition temperature	Not applicable
Decomposition temperature	225-250°C (437-482°F)

10. Stability and reactivity

Reactivity	Contact with small amounts of water may result in an exothermic reaction with the liberation of toxic fumes.
Stability	Stable under normal conditions
Possibility of hazardous reactions	Contact with acid liberates toxic gases. If heated by outside source to temperatures above 240°C (464°F), this product will undergo decomposition with the evolution of noxious gases.
Conditions to avoid	Heating above decomposition temperature. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.
Materials to avoid	Strong acids and/or alkalines. Reducing agents. Combustible material. The active ingredient in this preparation is a strong oxidising agent. The preparation of concentrated solutions or slurries is not recommended. Avoid contact with water on concentrated material in the container. Also avoid contact with easily oxidisable organic material: ammonia, urea or similar nitrogen containing compounds; inorganic reducing compounds; floor sweeping compounds; calcium hypochlorite and alkalis.
Hazardous decomposition products	Nitrogen trichloride, nitrogen, cyanogen chloride, phosgene, chlorine and CO.

11. Toxicological information

Note: *The toxicological data refer only to the active ingredient unless otherwise specified*

Likely Routes of Exposure

- Skin
- Eye contact
- Inhalation
- Ingestion

SAFETY DATA SHEET

According to OSHA Hazard Communication Standard 29 CFR 1910.1200 (GHS)

Product name	Clearon EZ Bleach Disinfectant Tablets	
Product id	AS_9717BT_CLR	
Revision date	5/14/2020	Revision: 2

Acute toxicity:	
- Rat oral LD50	>2000 mg/kg (the product as a whole)
- Rabbit dermal LD50	>5000 mg/kg
- Rat inhalation LC50	0.27-1.17 mg/L/4h
- Dermal irritation (rabbit)	Moderate irritant
- Eye irritation (rabbit)	Severe irritant
Dermal sensitization	Not a sensitizer
Chronic toxicity	Chronic inhalation exposure may cause impairment of lung function and permanent lung damage. Based on animal studies, exposure to concentrations of monosodium cyanurate at the solubility limit may cause cardiovascular, kidney and urinary bladder effects.
Mutagenicity	Not mutagenic by the Ames Test.
Carcinogenicity	Not known to be a carcinogen. Not classified by IARC, OSHA, EPA. Not included in NTP 13th Report on Carcinogens
Reproductive toxicity	No data available

12. Ecological information

Note: The environmental toxicity data mentioned below are from studies conducted on the active ingredient.

Aquatic toxicity :	
- 96 Hour-LC50, Fish	0.13-0.36 mg/l (Rainbow trout) 0.25-1.0 mg/l (Bluegill sunfish) 1.21 mg/l (Inland silverside)
- 96 Hour-EC50, Marine Invertebrate	1.65 mg/l (96h, Mysid shrimp)
- 48 Hour-EC50, Marine Invertebrate	0.196 mg/l (Water flea)

Avian toxicity:	
- Oral LD50, Bobwhite quail	1732 mg/kg

SAFETY DATA SHEET

According to OSHA Hazard Communication Standard 29 CFR 1910.1200 (GHS)

Product name	Clearon EZ Bleach Disinfectant Tablets	
Product id	AS_9717BT_CLR	
Revision date	5/14/2020	Revision: 2

- Oral LD50, Mallard duck 1916 mg/kg

- Dietary LC50, Mallard duck >10,000 ppm
 - Dietary LC50, Bobwhite quail 10,000 ppm

Persistence and degradability The materials used in this preparation will not persist in the environment. The free available chlorine from Sodium dishloroisocyanurate is rapidly consumed by reaction with organic and inorganic materials to produce chloride ion. The stable degradation products are chloride ion and cyanuric acid. Sodium Dichloroisocyanurate is subject to hydrolysis. Cyanuric acid produces by hydrolysis is biodegradable.

Bioaccumulative potential Not bioaccumulative

Note: Not considered to be PBT or vPvB

13. Disposal considerations

Waste disposal Avoid access to streams, lakes or ponds. Observe all federal, state and local environmental regulations when disposing of this material. Do not transport damp or wet material. Neutralise materials to a non-oxidising state for safe disposal.

Disposal of Packaging Clean Container and dispose of according to local and national regulations

14. Transportation information

Independent tests, carried out by TNO Prins Mauritis Laboratory, conducted according to the procedure as described in the United Nations Recommendations on the Transport of Dangerous Goods, Manual of Tests and Criteria, third revised edition, test O.1. have demonstrated that the product is not oxidizing for transport

DOT NOT REGULATED FOR ROAD TRANSPORTATION

For Vessel only:
 UN No. 3077
 Proper shipping name: Environmentally hazardous substance, solid, n.o.s (contains Sodium dichloro-s-triazinetrione)
 Class: 9 - Miscellaneous Hazardous Materials
 Packing Group: III
 Labels: 9
 Note: Certain shipping modes or package sizes may have exceptions from the transport regulations and may be classified as Consumer Commodity and Limited Quantity. The classification provided may not reflect those exceptions and may not apply to all shipping modes or package sizes.
